Educational

King Mongkut's Institute of Technology Ladkrabang *August 2022 - Present*

Bachelor of Science in Computer Science GPA : 3.39

Experience

TTB Bank Internship – DevOps Engineer *Jan 2026 – Present*

- **Standardized CI/CD pipelines** across multiple projects by refactoring legacy Jenkinsfiles to **utilize Central DevOps Shared Libraries**, ensuring compliance with organizational security policies
- **Hardened application security** by migrating **Spring Boot** and **Angular** projects to **Enterprise Red Hat (RHEL)** base image, utilizing **multi-stage Docker builds** to minimize image size and attack surfaces.
- **Created a centralized ELK monitoring dashboard** to track incoming requests and error accumulation, enabling real-time visibility.
- Built native-integrated **"Passport Reader" shared libraries (.aar for Android and .xcframework for iOS)**, optimizing low-level hardware interaction for faster and more reliable **digital identity verification**.
- Optimized service reliability within **NestJS** applications by implementing **Rate Limiting** to prevent system exhaustion and developing a **Global Exception Filter** for standardized, traceable logging.

IBM Internship – Platform Engineer (Client Engineer Team) *Jun - Nov 2025*

- **Led a CSR project** with **Kasetsart University** to promote sustainability by developing a **fish detection platform**.
- Designed and delivered **Proof of Concepts (PoCs)** to validate feasibility and accelerating client transformation, leveraging tools such as **Terraform (Enterprise)** for IaC deployment, **IBM Instana** for full-stack observability, and **watsonx Orchestrate** for orchestrate AI agent.

Projects

Thai-Seatizen: Fish Detection Platform (IBM & Kasetsart University MOU) *Aug – Nov 2025*

- **Full-stack development**, building the responsive frontend user interface using **Next.js** and implementing the high-performance backend API with **Hono.js**.
- **Led the database design and architecture** by creating a detailed diagram to support scalable storage and retrieval of fishery data.
- **Automated database seeding scripts** to populate development and staging environments, ensuring data consistency across the team.
- **Improved CI/CD efficiency** by establishing an automated pipeline using **GitHub Actions** for continuous integration and orchestrating continuous deployment (CI/CD) to **IBM Code Engine** (Serverless).

E-commerce Platform *Mar – Apr 2025*

- **Developed a full-stack e-commerce platform** utilizing **Next.js** (frontend) and **Spring Boot** (backend) established a unified **CI/CD pipeline** by containerizing the application with **Docke**r and deploying services on **AWS EC2** via **Jenkins**.
- Implemented **Infrastructure-as-Code (IaC)** using **Terraform** to provision and manage AWS cloud resources, ensuring consistent and automated deployment.

Skills & Others

- **Cloud & DevOps:** AWS, Kubernetes, OpenShift, Terraform, Jenkins, ArgoCD, Docker, GitHub Actions, Vault, SAST/DAST/SCA Tools.
- **Backend & Systems:** Spring Boot, NestJS, Express, Hono.js, SQL, NoSQL, Maven, Gradle.
- **Frontend:** Next.js, React, Svelte, Tailwind CSS.
- **Languages:** English (TOEIC: 870), Thai (Native).
